

## PERSONAL STATEMENT

I'm an aspiring web developer driven to continuously further my education and experience in the endlessly growing industry. I graduated from the DevMountain bootcamp in 2015 and plan to keep up with the latest technologies to enrich my knowledge and enhance my career.

The past few years I have supported myself financially working at US Synthetic, a manufacturer of polycarbonate diamond cutters for oil-rig drill bits. However, I recently decided to switch career paths to something that I love and feel passionate about.

In my own time, I find myself watching Javascript tutorials, listening to online video lectures, and learning about new technologies that I can implement in my own personal projects. I have recently discovered that one of my favorite parts of development is having the ability to make ideas come to life. I have also come to realize that I am very passionate about interface design and user experience.

I'm very excited about all the opportunities that the software industry holds and can't wait to see what the future holds for my career.

## MY SPECIALTIES

## SKILLS – A Continuous Work In Progress

### 01 Computer Languages

HTML5	• • • • •
CSS3	• • • • •
Vanilla Javascript	• • • • •
Angular.js	• • • • •
Node.js	• • • • •

### 02 General

Team player	• • • • •
Research	• • • • •
Office Products	• • • • •
Communication	• • • • •
Debugging	• • • • •
Git / Bash Command Line	• • • • •
Design	• • • • •

## LANGUAGES

- HTML5
- CSS3
- Javascript(Angular.js, jQuery, and React)
- Node.js
- MongoDB

## PROJECTS

### Debt Payback

A MEAN stack web app that keeps track of debts owed to you and reminds those who are indebted. This application automatically sends out reminders via email using Sendgrid and text using Twilio to kindly and non-confrontationally remind people of a debt they owe to you, what it was for, and with the option to attach a personalized message. While working on this project I learned much about working on a team and using Git.

## EDUCATION

### DevMountain

MEAN Stack Web Development

May 2015 – August 2015

### Utah Valley University

Computer Science

## ACHIEVEMENTS

### GRADUATED DEVMOUNTAIN BOOTCAMP 2015

A great experience I'm grateful to have had the opportunity to be a part of. I did very well in the class and was able to keep up on the curriculum. I developed an invaluable skill set for web-development and learned some very important problem-solving methods I intend to continually utilize through my career.
