Objective

Responsible and hard-working computer science major with excellent communication skills and ability to work well with others in a fast-paced evolving work environment. Possesses a passion for coding as well as learning and personal development in general. Motivated and enthusiastic worker with a strong desire to foster cohesive learning atmospheres among team oriented work environments. Attended DevMountain's immersive web development boot-camp and now pursuing higher education and career in the field of code.

Skills & Highlights

- Systematic problem-solver
- MEAN Stack Developer
- UX Enthusiast
- Resourceful
- Team player
- Microsoft Office
- Professional and mature
- Self-directed
- Project management
- Experience w/ Salesforce.com

Developer Skills

- HTML5/CSS3
- Vanilla Javascript
- Node.js
- Angular.js
- MongoDB
- CSS Pre-processors(SASS)
- Familiar w/ Bootstrap, Materialize.js
- jQuery

Experience

Student/Web Developer, DevMountain, Provo, Utah

May 2015 - August 2015

- Worked with a team of 5- Built an app that tracks all debts owed to the user and sends out reminders via email or mobile phone text message to the indebted at times specified by the user.

Operator, US Synthetic, Orem, Utah

January 2013-January 2015

- Worked in environment where problem-solving and continuous improvement of the worksite and standard work method were culturally ingrained and practiced daily.
- Led team of 8 operators in collaborative strategy to optimize production which led us to produce quality product with the highest consistency in the entire company.
- Copied and expanded devised methods of improving worksite to other teams within company which in turn led company to celebrate 2 years of record breaking sales and highest net revenue ever in 2013/2014.

Associate, Sprouts Farmer's Market, Orem, Utah

November 2011 – January 2013

- Sale-floor maintenance and organization, customer service, stocking.

Associate, Good Earth Natural Foods, Provo, Utah

August 2009 - November 2011

- Sales-floor maintenance, sales strategy, customer service, cash operations, stocking.

Sales Representative, APX Alarm Pittsburgh Office 2008, Pittsburgh, Pennsylvania

April 2008-Sept. 2008 (Seasonal)

- Door-to-door sales of commercial facility and home security systems.
- Responsible for contract negotiations (walkthrough of contract, data entry).
- Responsible for customer satisfaction, i.e. addressing customers' questions concerning contract and product.

Education

Graduate of **DevMountain** Coding Academy (MEAN Stack Web Development)

Currently studying at **Utah Valley University** on Computer Science BS - Orem, Utah

2015
2009-Current

PERSONAL STATEMENT

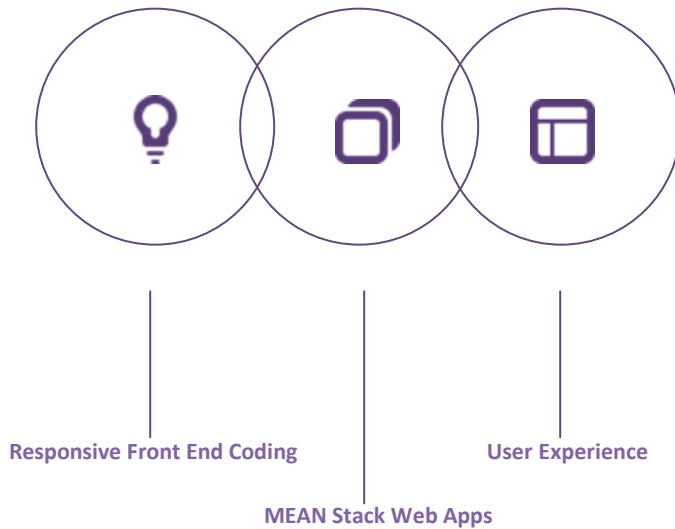

I'm an aspiring junior web developer driven to continuously further my education and experience in the endlessly growing industry. I graduated from the DevMountain bootcamp in 2015 and plan to keep up with the latest technologies to enrich my knowledge and enhance my career.

The past few years I have supported myself financially working at US Synthetic, a manufacturer of polycarbonate diamond cutters for oil-rig drill bits. However, I recently decided to switch career paths to something that I love and feel passionate about.

In my own time, I find myself watching Javascript tutorials, listening to online video lectures, and learning about new technologies that I can implement in my own personal projects. I have recently discovered that one of my favorite parts of development is having the ability to make ideas come to life. I have also come to realize that I am very passionate about user interface design and user experience.

I'm very excited about all the opportunities that the software industry holds and can't wait to see what the future holds for my career.

MY SPECIALTIES

SKILLS – A Continuous Work In Progress

01 Computer Languages

HTML5
 CSS3
 Vanilla Javascript
 Angular.js
 Node.js

02 General

Team player
 Research
 Communication
 Debugging
 Git / Bash Command Line
 Design

LANGUAGES

- HTML5
- CSS3
- Javascript(Angular.js, jQuery, and a little base knowledge of React)
- Node.js
- MongoDB
- Familiar w/ Bootstrap, Materialize.css/js, Grunt.js, app deployment and various other libraries
- Love SASS, familiar w/Bourbon, Compass

PROJECTS

Debt Payback

A MEAN stack web app that keeps track of debts owed to you and reminds those who are indebted. This application automatically sends out scheduled reminders via email using Sendgrid and text using Twilio to kindly and non-confrontationally remind people of a debt they owe to you, what it was for, and with the option to attach a personalized message. While working on this project I learned much about working on a team and using Git. 1

EDUCATION

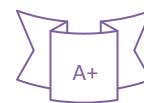

DevMountain

MEAN Stack Web Development
 May 2015 – August 2015

Utah Valley University

Computer Science

ACHIEVEMENTS

GRADUATED DEVMOUNTAIN BOOTCAMP 2015

A great experience I'm grateful to have had the opportunity to be a part of. I developed an invaluable skill set(MEAN stack) for web-development and learned some very important problem-solving methods I intend to continue to utilize through my career.
